PROFILE SUMMARY

Computer Science student focused on Java backend development with a strong foundation in DSA, OOP, and problem-solving. Skilled in Java, Spring Boot, REST APIs, Hibernate, JPA, and SQL, with familiarity in Spring Security and microservices. Interested in building scalable and efficient backend applications.

EDUCATION

I.E.C College Of Engineering and Technology

Bachelor of Technology in Computer Science with a CGPA of 7.89

Gr. Noida, Uttar Pradesh

Aug. 2023 – June 2027

Jananayak Chandrashekhar University

Bachelor of Arts Percentage: 50.83%

Ballia, Uttar Pradesh

2022

Gyan Peethika Senior Secondary School

Intermediate (CBSE) Percentage: 59.33%

Ballia, Uttar Pradesh

2019

Gyan Peethika Senior Secondary School

Matriculation (CBSE) CGPA: 8.6

Ballia, Uttar Pradesh

2017

PROJECTS

Local Car Rental Management System | *HTML, CSS, JavaScript, Browser Storage*

Feb. 2025 – Apr. 2025

- Developed a **web-based car rental system** for a local shop, supporting **20+ vehicles** and **50+ customers** with complete **end-to-end rental workflows** without backend infrastructure.
- Implemented **client-side data persistence** using **browser localStorage** to manage **car inventory**, **customer records**, **rental history**, and **payment transactions** on a single device.
- Built an **offline-capable admin dashboard** to track **total rentals**, **daily income**, **monthly sales**, and **active bookings**, enabling a **lightweight, zero-cost deployment** for small businesses.

Real-time Chat Application | *WebSocket, Java*

Jan. 2024 – Apr. 2024

- Developed a **real-time chat application** in Java using **WebSocket** for instant client-to-server communication.
- Implemented **concurrent connection management**, allowing the server to seamlessly handle multiple clients and broadcast messages in **real time**.

Smoke Detection & Alert System | *Arduino, ESP8266, Smoke Sensor, Buzzer*

Sept. 2023 – Nov. 2023

- Built a **real-time smoke detection system** using Arduino, ESP8266, and MQ-2 sensor, capable of detecting smoke concentration within **2–3 seconds**.
- Implemented **adjustable sensitivity levels** supporting **4 environment profiles**, reducing false alarms by approximately **30–40%**.
- Enabled **live Wi-Fi-based monitoring** using ESP8266, transmitting sensor readings every **2 seconds** for remote safety observation.

CORE COMPETENCIES

Languages: Java, C, JavaScript, HTML5, CSS3

Backend: Spring Boot, Hibernate, JDBC, REST APIs, Microservices, Spring Security

Databases: MySQL, MongoDB, Redis

Developer Tools: Git, GitHub, IntelliJ IDEA, VS Code, Postman, Maven, Docker

Core Concepts: OOP, Data Structures & Algorithms, DBMS, Collections, Exception Handling, Multithreading

Development: API Development, Authentication & Authorization, CRUD Operations, Microservice Architecture

Interpersonal Skills: Team Collaboration, Communication, Task Prioritization, Problem Solving

ACHIEVEMENTS

- Solved 250+ Data Structure and Algorithm problems on LeetCode**, strengthening analytical and logical thinking skills.
- Completed Google AI Agents Intensive Program**, gaining foundational exposure to AI concepts and practical applications.
- Gained hands-on experience at Dreamvessels Technology Pvt. Ltd.** working on **Advanced Excel and Power BI** for data analysis, dashboard creation, and business reporting.
